👤 PROFILE

Full Stack Web Developer with a Higher Vocational Training Diploma in Web Application Development, focused on **solution design** and **developing high-quality software** through **careful analysis, thoughtful planning**, and **software engineering best practices**.

Experienced in developing Full Stack web applications with Laravel and React, applying **SOLID principles**, MVC, and Domain-Driven Design (DDD).

Seeking to grow within collaborative engineering teams, taking on **increasingly complex technical challenges** while deepening my expertise in **software architecture** and **engineering best practices**.

📁 PROFESSIONAL EXPERIENCE

Full Stack Developer

EverlastingArt

02/2026 – 06/2026

- **Developed and implemented Full Stack features** using Laravel and React.
- **Analyzed business requirements** and collaborated with stakeholders to define technically viable solutions.
- **Developed and maintained REST APIs**, improving security and integrating external services such as Mailgun.
- **Resolved issues** and contributed to application enhancement and maintenance following a Kanban workflow.

Web Developer

Pango Studio

04/2025 – 06/2025 | Remote

- **Developed backend features** using Laravel.
- **Tested and validated REST APIs** using Postman.
- **Imported, transformed, and validated data** using CSV files.

🎓 EDUCATION

Higher Vocational Training Diploma in Web Application Development

ILERNA Seville

2024 – 2026

- **Full Stack** web application development.
- **Software design** and **relational database modeling**.
- Software **architecture** and software **engineering best practices**.

📁 FEATURED PROJECT

MIKIWI

01/2026 – 05/2026

- **Designed and developed a Full Stack e-commerce application** using Laravel, React, and Inertia.js.
- Designed an architecture based on **Domain-Driven Design (DDD)** principles.
- Developed **REST APIs**, applying **PostgreSQL**, **Git Flow**, and **CI/CD practices** with GitHub Actions.

Repository

🧩 TECHNICAL SKILLS

Backend Development

- **Developing and maintaining web applications** primarily using Laravel and PHP.
- **Designing and implementing REST APIs**, applying validation, business logic, and error handling.
- **Modeling relational databases** using migrations, seeders, and Eloquent ORM.

Frontend Development

- **Developing reactive user interfaces** with React and Inertia.js.
- **Building reusable components** and managing application state.
- **Developing responsive user interfaces** using Tailwind CSS and Bootstrap.

Databases

- **Designing relational database schemas** and defining entity relationships.
- **Managing databases** with MySQL, PostgreSQL, and SQLite.

Tools & Workflow

- **Version control** using Git, GitHub, and Git Flow.
- **Dependency management** and project builds with Composer, npm, and Vite.
- **API testing and documentation** with Postman, along with basic Continuous Integration (CI) using GitHub Actions.
- **Leveraging AI tools** throughout the software development lifecycle, including requirements analysis, solution design, implementation, debugging, documentation, testing, refactoring, and optimization.

Software Architecture & Best Practices

- **Organizing applications** following the MVC architectural pattern.
- **Applying SOLID principles** and separation of concerns to build maintainable software.
- **Applying Domain-Driven Design (DDD) principles** in personal projects.
